BASHAR RASHID

Amman, Jordan | (+962) 790920127 | basharrashedai@gmail.com
LinkedIn | GitHub | Credly

PROFESSIONAL SUMMARY

Machine Learning Engineer with hands-on experience in building and deploying AI solutions using machine learning and deep learning techniques. Skilled in data preprocessing, model development,and applying AI to real-world problems. Experienced in developing end-to-end machine learning pipelines, including data preparation, model training, evaluation, and deployment using APIs and web applications. Proven ability to translate data into functional AI systems through practical implementation of modern machine learning workflows.

EDUCATION

Tafila Technical University, Jordan | B.Sc. in Artificial Intelligence and Data Science | GPA: 82.62/100

EXPERIENCE

Artificial Intelligence Department Intern — Jordan Customs | **26 June 2025 – 24 September 2025**

- Used Python for data processing, cleaning, and analysis to support AI workflows.
- Developed REST APIs using FastAPI and implemented OCR for text extraction from scanned documents.
- Gained practical exposure to Machine Learning, Deep Learning, Computer Vision, NLP, LLMs, and GANs.

PROJECTS

Additional projects are available on my GitHub and LinkedIn profiles.

Smart Student Attendance System — Graduation Project

- Developed an AI-based attendance system using Python, OpenCV, YOLOv8Face, and ArcFace for face detection and recognition.
- Integrated face processing and identity recognition into a practical attendance workflow.

CardioChest AI — Chest X-ray Analysis System

- Built a multi-label chest X-ray classification model using DenseNet121 transfer learning.
- Created an end-to-end pipeline for image preprocessing and probability-based predictions, then deployed it as a Flask web application.

SmartPark AI — Parking Space Detection

- Trained a YOLO-based model to detect parking-space availability using the PKLot dataset.
- Achieved mAP@50 of 0.994 and mAP@50–95 of 0.967 on the project evaluation.

Fitness & Health Analyzer

- Developed a K-Means clustering application with data preprocessing and feature scaling; built an interactive Streamlit interface for visualization.

Car Price Prediction — Machine Learning

- Developed a machine learning solution to predict car prices using a dataset of approximately 18,000 car listings in Jordan.
- Performed data preprocessing and feature engineering to prepare the data for predictive modeling.

CERTIFICATIONS

View all verified credentials on my Credly or LinkedIn profiles.

- Advanced Deep Learning Specialist Badge — IBM credly (2026)
- IBM Machine Learning Professional Certificate – IBM (2026).
- Artificial Intelligence on Microsoft Azure – Microsoft (2025).
- Artificial Intelligence Fundamentals — IBM SkillsBuild (Aug 2025).
- Data Science & Analytics — HP LIFE (Feb 2025).

TECHNICAL SKILLS

Programming & Data Analysis: Python, Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Data Preprocessing
Machine Learning & Deep Learning: Scikit-learn, Supervised & Unsupervised Learning, Regression, Classification, Clustering, Model Evaluation, Neural Networks, CNNs, TensorFlow, Keras.
AI & Computer Vision: Computer Vision, Image Processing, OCR, OpenCV, YOLO
Deployment & APIs: Flask, FastAPI, Streamlit, Model Deployment
Tools & Environments: Git, GitHub, Anaconda, Conda, Jupyter Notebook
Languages: Arabic (Native), English (Professional Working Proficiency)
