Career Objective

Graduate in Artificial Intelligence and Data Science with strong skills in Python, data analysis, and machine learning. Experienced in building and deploying real-world AI systems and solving practical problems using data-driven approaches. Passionate about applying machine learning and deep learning techniques to create impactful solutions. Seeking a full-time role in machine learning, data science, or AI where I can contribute my technical skills and continue to grow professionally.

Internship Experience

Artificial Intelligence Department, Jordan Customs

26 June 2025 – 24 September 2025

- Applied Python to solve real-world data analysis challenges.
- Processed and analyzed datasets using multiple tools to extract actionable insights.
- Developed and consumed APIs using FastAPI to integrate AI models and data pipelines.
- Gained foundational knowledge in Machine Learning, Deep Learning, Computer Vision, and Natural Language Processing (NLP).
- Explored advanced AI topics such as Large Language Models (LLMs) and Generative Adversarial Networks (GANs).
- Worked with OCR technologies to extract text from documents.

Key Skills Acquired: Python programming, data analysis, AI fundamentals, NLP, LLMs, GANs, OCR, analytical thinking

Education

B.Sc. in Artificial Intelligence and Data Science

Tafila Technical University (TTU), Jordan | GPA: 82.7/100 (Very Good) | Expected Graduation: 2026

Certifications

- [IBM Machine Learning Professional Certificate— IBM \(2026\)](#)
- [Unsupervised Machine Learning — IBM \(2026\)](#)
- [Supervised Machine Learning: Classification — IBM \(2026\)](#)

[GitHub](#) • [Credly](#) • [LinkedIn](#) • [Huggingface](#)

- [Supervised Machine Learning: Regression — IBM \(Jan 2026\)](#)
 - [Exploratory Data Analysis for Machine Learning — IBM \(Nov 2025\)](#)
 - [Artificial Intelligence on Microsoft Azure — Microsoft \(Nov 2025\)](#)
 - [Artificial Intelligence Fundamentals — IBM SkillsBuild \(Aug 2025\)](#)
 - [AI for Beginners — HP LIFE \(Feb 2025\)](#)
 - [Data Science & Analytics — HP LIFE \(Feb 2025\)](#)
 - [Python Fundamentals — SHAI For AI \(Feb 2025\)](#)
 - [Git and GitHub — IEEE Robotics TTU \(Dec 2024\)](#)
 - [Building and Developing Projects with Arduino — Crown Prince Foundation \(Oct 2024\)](#)
 - [Programming Foundations \(2023\)](#)
 - [Algorithms & Problem-Solving \(2023\)](#)
-

Languages

- Arabic: Native
 - English: Good (Written & Spoken)
-

Technical Skills

- **Programming Languages:** Python (Intermediate), C++ (Intermediate)
 - **Data Analysis:** Pandas, NumPy
 - **Visualization:** Seaborn, Matplotlib, Bokeh
 - **Machine Learning:** Scikit-learn, Classification, Clustering, Feature Engineering
 - **Deep Learning:** TensorFlow, Keras, CNNs, Transfer Learning
 - **Tools:** Jupyter Notebook, Google Colab, VS Code, Git , Pycharm
 - **Web & Deployment:** Flask, FastAPI, Streamlit.
 - **Other Tools:** OCR
 - **Operating Systems:** Windows
-

Projects

CardioChest AI – Chest X-ray Analysis System

- Developed a deep learning model using DenseNet121 (Transfer Learning) for multi-label chest X-ray classification

Bashar Rasheed

basharrashedai@gmail.com • Amman, Jordan • (+962) 790920127

[GitHub](#) • [Credly](#) • [LinkedIn](#) • [Huggingface](#)

- Built a full pipeline including preprocessing, model inference, and probability-based predictions
- Evaluated model performance using AUC, Precision, and Recall with threshold tuning
- Deployed the system as a Flask web application for real-time analysis

Fitness & Health Analyzer (ML Web App)

- Developed a machine learning model using KMeans clustering to classify user lifestyle patterns
- Applied data preprocessing and feature scaling using StandardScaler
- Built an interactive interface with data visualization using Streamlit and Plotly
- Deployed the application for real-time user interaction

Breast Cancer Classification System

- Built classification models using Logistic Regression, Random Forest, and SVM
- Performed feature selection to improve model performance
- Evaluated models using accuracy, precision, recall, and confusion matrix
- Deployed the system using Flask for real-time predictions

EDA & ML Prep Web App

- Built a Flask-based tool for automated exploratory data analysis and preprocessing
- Supported CSV, Excel, and JSON file uploads
- Implemented missing value handling, encoding, scaling, and feature engineering
- Enabled export of processed data and trained preprocessing pipeline

Car Price Prediction System

- Developed a regression model using Ridge Regression and Scikit-learn Pipeline
- Applied data preprocessing including encoding, scaling, and cleaning
- Ensured consistent training and inference using pipeline architecture
- Deployed as a Flask web application for real-time predictions

Smart Translation System v2 – Jordan Customs

- Developed an AI-powered translation system supporting multiple languages

Bashar Rasheed

basharrashedai@gmail.com • Amman, Jordan • (+962) 790920127

[GitHub](#) • [Credly](#) • [LinkedIn](#) • [Huggingface](#)

- Integrated OCR and automatic language detection
- Used transformer-based models for high-quality translation
- Added support for multi-page documents and offline functionality

IDS Pipeline

- Developed a machine learning pipeline for detecting malicious network traffic
- Applied data preprocessing and feature selection techniques
- Trained classification models including Random Forest and Logistic Regression
- Evaluated performance using accuracy and F1-score

Network Traffic Classification

- Developed models to classify encrypted traffic patterns
- Applied classification algorithms including Naive Bayes and Decision Tree
- Evaluated performance using confusion matrix and F1-score

Soft Skills

- Team Collaboration
- Time Management
- Communication & Presentation

Interests

- Exploring AI trends: NLP, deep learning
- Data storytelling and visual analytics
- Staying updated with AI/tech innovations
